

# Annex 1 of the contract on using the registration service for Digital Object Identifiers (DOI)

## Service costs

By registering DOIs, the SUB generates no profit. In order to cover the costs of the SUB, the data center pays a yearly commission. This commission contains the license fees of the International DOI Foundation (IDF).

The exact costs are composed as follows:

### 1. Membership & DOI Registration

For academic institutions with head office in the European Union, the SUB provides the DOI registration free of charge.

Non-academic data centers and data centers with their head office outside of the European Union pay a yearly commission of 150,- Euro during the contract term. This commission includes the registration of 500 DOI names per year as well as the storage of the corresponding metadata in the systems of DataCite e.V. This commission is independent of the number of DOIs that have already been registered for the data center.

The costs for the registration of additional DOI names are calculated yearly per newly registered DOI name as follows:

:

Number of registered DOI names	Price per DOI name
501 – 5.000	0,20 Euro
5.001 – 50.000	0,15 Euro
50.001 – 100.000	0,10 Euro
100.001 – 1.000.000	0,06 Euro
1.000.001 -	0,03 Euro

Furthermore, the SUB and the data center can agree on an individual package.

### 2. DOI Updates

No fee is being charged for the changing of a URL or other metadata of a DOI name.
